Additional information required if the application is for the extraction of minerals by opencast methods
(5 completed copies of this form should be submitted)

SITE DETAILS AND PLAN REQUIREMENTS

1. Total area of land covered by the application (including all storage and stockpile bunds, the haul route and access to public highway and other ancillary operations and structures):

   23.2 hectares (Edge this area in red on the plan.) Plan Ref: 95010/E2/A/1

2. Type(s) of mineral to be extracted: Sand and Gravel

3. Proposed area(s) of mineral extraction: 16 hectares

   Please detail on plan including areas in the application from which minerals have previously been extracted. Plan Ref: 95010/E2/A/1

TECHNICAL DETAILS AND PLAN REQUIREMENTS

4. (a) Estimated thickness of topsoil: 0.2 metres

(b) Estimated thickness of subsoil: 0.4 metres

(c) Estimated thickness of overburden: 1.4 metres

5. Level of existing water table in land in relation to the existing surface level: 1.0 metres

   Please details 4 and 5 in cross-section form. Plan Ref: 95010/E2/CO/1

6. Present contours of the application site and surrounding land: Plan Ref: 95010/E2/A/1

OPERATIONAL DETAILS AND PLAN REQUIREMENTS

7. Method, direction, estimated rate of working and phasing of working.

   Please detail in plan form and describe in written statement supporting application. Plan Ref: 95010/E2/PO/1a

8. Estimated maximum depth of working below existing ground level: 9 metres

   Please detail in cross-section form. Plan Ref: 95010/E2/CO/1

9. (a) Estimate of total quantity of mineral to be extracted: 550,000 m$^3$ 850,000 - 900,000 tonnes
(b) Estimate of net saleable mineral to be extracted: 550,000 m³ 850,000 - 900,000 tonnes

10. (a) Estimate of annual quantity of mineral to be extracted: 70,000 m³ 120,000 tonnes

(b) Estimate of annual quantity of saleable minerals: 70,000 m³ 120,000 tonnes

11. Estimated life of workings: 7 years 6 months

12. Proposed starting date of workings if consent is given: June 2020

13. Method of transport to and from workings:

(a) Type of HGV's to be used (and maximum laden weights and no. of axles of lorries): Articulated dump trucks 45 tonne, 3 axle

(b) Total average daily HGV movements (in and out of site equals two movements): 50

(c) Identify on plan the highway route to be used to (and from) primary road network and describe in written statement.

Plan Ref: 95010/E2/A/2 Written Statement Ref: Section 4.3

ANCILLARY OPERATION / PLAN REQUIREMENTS

15. Position and nature of any fixed plant that is proposed to be erected: Please detail on plan. Plan Ref: N/A

16. Is it proposed to erect any temporary buildings on site? No

If yes, please provide details of location, size, materials, colours in and include drawings of elevations, on plan and describe in written statement.
Plan Ref: Written Statement Ref:

RESTORATION, LANDSCAPING AND AFTERCARE

17. Method, direction, phasing and timescale of restoration / backfilling.

Please detail on plan and describe in written statement. If materials need to be imported on the site then please complete Part V Form.
Plan Ref: 95010/E2/PO/1a Written Statement Ref: Section 4.10

18. Landscaping proposals

Please detail on plan and describe in written statement. If you require advice on this matter please contact the County Planning Authority.
Plan Ref: Written Statement Ref: Section 4.10

19. Aftercare proposals / Future land use of site.

A detailed statement of a five year aftercare programme will need to be submitted to the County Planning Authority if consent is given for the application.
Plan Ref: Written Statement Ref: Section 4.12
This form should be completed (in addition to the Part I application form and any other relevant forms) for proposals covered by Schedule 1 (1) (b) (e) (f) and (g) of the Town and Country Planning Act 1990. That is, it should be completed for proposals involving use of land, or the erection of a building, plant or machinery, on land for the carrying out of any process for the preparation or adaptation for sale of any mineral or the manufacture of any article from a mineral on land on or adjacent to a mineral working or connected to it by private means of transport. It should also be completed for any proposed use of land for any purpose in connection with the transport by rail or water of aggregates or any buildings, plant or machinery proposed to be used in connection with them or utilising minerals. Finally, it should be used for any proposal on any land for the erection of any building, plant or machinery which it is proposed to use for the manufacture of cement. This form should only be completed where planning permission is required. Please read the accompanying guidance notes at the end of this form before completing these questions.

A6.1 (i) Summarise the buildings, plant and machinery to be erected or use proposed, the processes proposed and the products to be made:

Not applicable as all mineral will be taken to the existing plant site for processing and onward delivery.

A6.2 Proposed duration of use or operation:

(ii) is it to be permanent? Please select

(iii) If yes, specify type and storage method:

A6.3 (i) Maximum height of any buildings, plant as measured from existing ground level: metres

(ii) Maximum height of stockpiles or storage facilities for processed material as measured from existing ground level: metres

A6.4 Plant capacity:

<table>
<thead>
<tr>
<th>Estimated normal capacity of plant</th>
<th>Tonnes per hour</th>
<th>Tonnes per year</th>
</tr>
</thead>
</table>

| Estimated maximum capacity of plant |                |
|-------------------------------------|

A6.5 Source of water (if any) to be used in process:

A6.6 Details of waste arising from processes:

(i) Nature of wastes:

(ii) Estimated annual quantity produced: m³
(iii) Describe what will happen to any wastes produced.

A6.7 In the case of proposals in or adjacent to existing or proposed quarries, what minerals and other materials, and what quantities (tonnes per year) will be:

(i) Imported from outside the quarry (describe the method of transport as well):

(ii) Won from the quarry:

A6.8 In the case of proposals at, or adjacent to, existing or proposed rail head deposits what minerals and other materials, and in what quantities (tonnes per year) will be imported:

(i) By rail to the site:

(ii) By road to the site:

A6.9 Summarise method(s) of transportation of processed materials from the proposed site:

A6.10 (i) Is it proposed to use an existing means of access to the application site? Please select

(ii) If Yes, summarise the access details:

A6.11 (i) Are new access arrangements to be constructed or alterations to existing access proposed? Please select

(ii) If Yes, summarise the proposals:

A6.12 Heavy Goods vehicle generation (daily):

<table>
<thead>
<tr>
<th>Estimated number of loaded vehicles likely to enter the site</th>
<th>Average (daily)</th>
<th>Maximum (daily)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Estimated capacity of loaded vehicles entering the site</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Estimated number of loaded vehicles likely to leave the site</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Estimated capacity of loaded vehicles leaving the site</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

A6.13 (i) Summarise routes to be used to and from the primary road network and show on plan:

(ii) Proposed methods to be used to control transport imports:

A6.14 In the case of buildings give the floor space in square metres:

Existing: \( m^2 \)

Proposed: \( m^2 \)

A6.15 Describe measures for controlling noise and methods of noise monitoring (as relevant):

A6.16 Describe proposed measures for controlling and suppressing dust and minimising spread of minerals and waste onto the public highway:

A6.17 (i) Will any hazardous materials be used or stored on site? Please select
(ii) If yes, specify type and storage method:

A6.18 (i) Outline any measures to control water pollution:
(ii) State the measures to be taken to prevent the spillage or seeping of fuel oils during delivery, storage and handling on site:

A6.19 State whether any processes are to be registered under Part A and B of the Environmental Protection Act 1990 and describe the nature of these operations:

A6.20 For any buildings give details of colour and type of materials for:

(i) Walls
(ii) Roofs
(iii) Windows
(iv) Doors
(v) Means of enclose (e.g. fencing/walls)

A6.21 For any plant give details of their proposed colour(s).

GUIDANCE NOTES FOR MINERALS RELATED DEVELOPMENT (MRD)

A6.1-9 For this section it is preferable that answers are amplified in both supporting statements and plans to give planning officers to full appreciation of the purpose and likely planning implications of the proposed development.

A6.10-13 Much of this section is designed for road transport with the exception of A6.8(i). Please indicate details of other rail or water transport in an additional statement and plans including details of access, parking and vehicle movement on site.

For road transport, a supporting plan showing the traffic levels along the proposed routes for laden and unladen lorries is particularly helpful. For other modes, applicants should provide details of the tonnages likely to be moved, the range of market destinations, and the timing of movements.

Where there is a need for highway improvements to be carried out as a consequence of the proposed development, applicants will normally be required to undertake these at their own expense or reimburse the Highway Authority for the cost of undertaking such improvements. Such improvements will need to be implemented before development starts. If the proposal is likely to generate significant amounts of heavy vehicle traffic and/or heavy vehicles would use roads of poor construction, width or alignment, applicants are strongly advised to contact the appropriate Highway Authority. Highway Objections may be overcome by routing vehicles on specific roads. You may be asked to enter a formal agreement to secure that routing or submit a routing scheme which would be controlled by a planning condition.

A6.14 The site plan should clearly show which are existing and which proposed buildings.

A6.15 Information should be given on measures taken for controlling noise (e.g. screening bunds, acoustic cladding etc.). Where minerals related development (MRD) is on a proposed or existing mineral extraction site the information provided on noise in that application should include the MRD.

Where the MRD is on a site which has noise controls by planning condition, information should be given to show that those controls will not be breached.

Where the MRD is not on a noise controlled site and is within 200 metres of a noise sensitive building, applicants should provide details of noise levels at these properties or areas scheduled for development. Proposed methods for noise monitoring and measures for controlling noise should be specified. The case officer may ask for noise level and control information for MRD greater than 200 from noise sensitive buildings if it appears that the MRD is potentially very noisy. A need for this information can be established at a pre-application meeting.

Information on noise is best submitted in a supporting statement but may be included on the form.

Advice on noise control can be obtained from the Environmental Health Officer in the relevant District Council.
A6.16 Applicants should state methods to control and suppress dust from the operations including how dust is to be prevented from contaminating vehicle circulation areas.

A6.17 Applicants who are uncertain whether or not the materials in the proposal involves the use and storage of hazardous materials should contact the Health and Safety Executive.

For materials which may create a hazard, applicants should indicate the hazardous materials, what special consideration will need to or has been given to the siting of development which involves the use of such materials, and how the material is intended to be stored. Further guidance can be obtained from DoE Circular 11/92 on the Planning (Hazardous Substances) Act 1990, brought into force on 1st June 1992. Further advice may be obtained from the Health and Safety Executive.

A6.18 Where relevant, applicants should give an outline of proposed measures to control potential pollution to protect ground water. In particular, measures to control wastes and waste water are needed.

A6.19 To be completed as relevant.

A6.20 For buildings that are intended to be permanent the County Council will expect them to be of permanent design.

A6.21 Where MRD is in the countryside plant will be expected to be located to reduce visual impact and to be coloured so that it blends in with the surrounding landscape as far as possible. In urban areas the MRD should be coloured to blend in with surrounding industrial buildings and should meet the policies of the district local plan in this matter.
