3. Description of Proposed Works
Please describe the proposals to alter, extend or demolish the listed building(s):
It is proposed to install a bridge walkway between two flat roof's to provide safe access to plant rooms only accessed off the roof above the library. The bridge walkway will be painted black to try and match the appearance to existing small walkway which has been deemed unsafe. There will also be free standing fall protection provided forming walkways to both flat roofs providing safe roof access away from the low parapet walls. It is finally proposed to upgrade the emergency lighting to ensure that a safe egress route is provided in the event of a power cut.

Has the work already started without planning permission? No

### 9. Materials

Please provide a description of existing and proposed materials and finishes to be used in the build (demolition excluded):

**Roof covering - add description**

Description of existing materials and finishes:

The 2 No. flat roofs consist of a combination of asphalt and felt coverings with stone chippings. To the leading edge of the flat roofs are low level parapet walls with concrete copings and felt upstands. The existing bridge walkway between the two flat roof areas is now deemed unsafe and consists of a small metal bridge/walkway painted black.

Description of proposed materials and finishes:

The new proposed bridge walkway will constructed of steel, painted black and will be fixed to concrete copings and brickwork to the parapet wall. The new proposed KeyGuard Foldshield fall protection will not be fixed to the roof as it relies on horizontal weights to provide support.

**Lighting - add description**

Description of existing materials and finishes:

The existing external light fittings are fitted to the walls adjacent to the flat roofs and are hard wired down to a switch at the bottom of the internal cat ladder.

Description of proposed materials and finishes:

It is proposed to modify the existing light fittings to provide emergency light fittings to ensure that safe egress can be achieved off the roof in the event of a power cut.
