SCALE 1:200
Access to internal remodeling areas and covered play. Controlled safe access for personnel to be coordinated with school. Materials transferred out of school hours.

Signage to close-off exit door from Library during works (alternative escape routes available within school).

Temporary screen to block off toilets/cloaks as agreed with school.

Contractor's compound, cabins, materials store area during construction.

Existing tree to be maintained (no proposed works to tee). To be protected to BS 5837:2012 guidelines with 2m high Heras fencing and stabiliser struts and ground pins (or mounted on block tray) as Figure 3. Protective fencing to be located outside of root protection area indicated.

No storage of materials, or new underground drains/services within RPA is permitted.
