Dear Mrs Pawson

HARLESTONE QUARRY: NOISE

Thank you for the copies of the current drawings for Harleston Quarry, Drawing Numbers:

- GPP/BP/HA/08/Phase 1;
- GPP/BP/HA/08/Phase 2;
- GPP/BP/HA/08/Phase 3;
- GPP/BP/HA/08/Phase 4;
- GPP/BP/HA/08/Phase 5; and
- GPP/BP/HA/08/Phase 6.

I have reviewed the current drawings and the assessment carried out for this site by ANV in May 2005. I understand that the plant employed on the site is effectively as described in our May 2005 report and that the bunds shown on the current drawings are of at least 3 metres in height in accordance with the recommendations of the assessment. The phasing of some of the works differs slightly from the proposals assessed in 2005. However, it is my view, that the noise requirements of Annex 2 of MPS 2 will still be met at all the potentially affected locations and that the noise effects will still be as described in the May 2005 assessment.

I trust that this is clear and sufficient for your current requirements. Do not hesitate to contact me should you wish to discuss any aspects of this matter.

Yours sincerely

Michael Breslin
