

## Planning Statement for Mobile Classroom for Daventry William Parker School

William Parker School has recently been granted Specialist School Humanities Status. Within the successful bid was a request for an additional classroom ( mobile) to allow for the further development of ICT across the school through creating another specialist ICT room.

Whilst the school is going through a period of reduced student numbers, this is only short-term and would only release a Science Laboratory, which will only be partially used and then come back into full use.

The plan is to suite all three lead subjects, English, Geography and History within the same building and across two floors, all having direct access to the new ICT room. For this to happen it will be necessary to free up a classroom – hence the need for the additional mobile classroom and in so doing we will also be able to bring together all R.S. teachers and create a suited arrangement for them as well.
